For Immediate Release

AMERICAN ENERGY'S AES PROVIDES UPDATE ON MOCANAQUA MINE TUNNEL PROJECT

ALLENTOWN, Pennsylvania – (July 25, 2019) – American Energy Partners, Inc. (“American Energy”) (PINK: AEPT), a diversified energy company, has provided an update on its subsidiary’s water augmentation project with [EPCAMR](#) and the [SRBC](#).

Direct testing of the mine water pool in the Mocanaqua Tunnel has indicated that the volume and chemistry contained therein is suitable for consumptive use mitigation. This field work and the continued water level monitoring and water quality testing has confirmed the success of Phase 1 and Phase 2 of the project.

John Pippy, President of American Energy Solutions (“AES”), states, “The consumptive use feasibility report, which will include an estimated volume and acid mine drainage treatment costs is currently on track to be submitted to the SRBC in December.” He went on to say, “The project remains on schedule without any major hick-ups to date and we are excited about its future.”

“EPCAMR’s primary focus is on the Priscilla Lee Basin which has the greatest potential for the largest volume of underground mine pool water in the Black Creek Watershed Basin for Consumptive Use Mitigation. While there are several other smaller mine pool basins in the region, they ultimately are draining to the larger mine pool complexes that still drain to the Mocanaqua Tunnel,” explained EPCAMR’s Executive Director, Robert Hughes.

If successful, the project will produce millions of gallons of treated mine influenced water on a daily basis to citizens of Pennsylvania and lower the amount of mine drainage pollution entering into the Susquehanna watershed.

American Energy Partners, Inc. (AEPT)

AEPT and its group of companies focus on providing solutions in markets where energy production and water meet technology. Collectively, the subsidiaries are engaged in the energy

sector as well as the design, construction and operation of regional water treatment facilities that serve the industrial, energy and government sectors.
